

## ELEVATOR BUTTON COVERS

Help keep riders safe while standing together

# Beat Even the Strongest Germs in Elevators with Aereus Bacteria Fighting Solutions

**Biocidal properties actively kill microorganisms, including surface bacteria\***

Elevator buttons utilizing CuVerro alloy provide permanent, 24/7 bacteria protection on high-touch surfaces. This functional surface technology can be easily retrofitted on existing buttons with precision laser cut elevator button covers and elevator fire safety rated adhesive. CuVerro alloy creates a safer rider experience by killing greater than 99.9% of bacteria\* within two hours, and continues to kill 99% of bacteria\* even after repeated contamination.

## WHY AEREUS TECHNOLOGIES ANTIMICROBIAL SOLUTIONS?

Aereus Technologies' EPA-registered antimicrobial copper products are a highly versatile way to continuously fight bacteria\*. Science suggests that antimicrobial copper surface contact kills bacteria\* with a multi-faceted attack. Its thin, durable copper alloy layer can be applied to almost any solid surface.

**CuVerro® Copper**  
continuously  
kills bacteria  
even after  
recontamination

Antimicrobial copper  
never wears out

Continuously kills  
99.9% of bacteria\*

A solid metal  
solution

Visually appealing  
finish

Does not use  
harmful chemicals

## THE VERSATILE CHOICE

Easily apply the power of copper across multiple industries and products, everywhere potential infectious-bacteria exposure is a concern.

## HOW COPPER KILLS BACTERIA

**A** Copper ions on the surface are recognized as an essential nutrient, and enter the cell

**B** A lethal dose of copper ions interferes with normal cell functions and membrane integrity

**C** Copper ions impede cell respiration/metabolism, sometimes causing DNA damage

\*Laboratory testing shows that, when cleaned regularly, CuVerro® surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: Methicillin-Resistant Staphylococcus aureus (MRSA), Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, E. coli O157:H7, and Vancomycin-Resistant Enterococcus faecalis (VRE). The use of CuVerro® bactericidal copper products is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. CuVerro® is a registered trademark of Wieland North America, Inc. and is used with permission. AE-0004-1809 For more information, visit [www.cuverro.com](http://www.cuverro.com)
